### *Monthly Jobs Report*

## **Revised January and February Preliminary Jobs Figures Released**

INDIANAPOLIS (March 17, 2006) – The number of jobs in Indiana is now 19,500 higher than this time last year while the seasonally-adjusted employment added 2,600 jobs from January, according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised January total of 2,965,900 jobs, while preliminary figures for February indicate 2,968,500 jobs.

“This month's jobs report, coupled with last week's announcement of unemployment figures, indicate that progress is being made,” said Ron Stiver, Commissioner of the Indiana Department of Workforce Development. “More people are employed, fewer people are unemployed, and the economy is growing jobs. While this is progress, we can not be satisfied as there is much work ahead on the road to Indiana's comeback. Economic development reforms enacted during the recently-concluded session will continue and expedite our momentum forward. The Major Moves Roads and Jobs plan, Telecom Reform Act, and changes in the state's tax code and incentive programs will all help pave the way for future economic growth.”

### **Seasonally Adjusted Figures**

The nation's seasonally adjusted figures for February show that U.S. employment gained 243,000 jobs during the month and 2.1 million over the year. The monthly gain was credited to continued strength in construction, education and health services and professional and business services. Meanwhile, Indiana remains approximately 45,400 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to January revised data was 2,965,900, whereas February preliminary figures were 2,968,500.

Compared with last year, the sectors with the largest increases in jobs were service providers including professional and business services, leisure and hospitality, and education and health services.

### **Non-Seasonally Adjusted Figures**

Indiana's February preliminary non-seasonally adjusted payroll estimates indicate 2,940,400 jobs for the state, while January's revised total reported 2,923,300 jobs. Most sectors posted modest over-the-month gains that were in line with recent trends.

## Non-Seasonally Adjusted Metropolitan Statistical Areas

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for January, with last month's and last year's job numbers:

MSA	Feb 06	Jan 06	Feb 05
Anderson	44,600	44,400	43,900
Bloomington	82,100	81,100	81,700
Columbus	42,900	42,400	42,300
Elkhart-Goshen	128,600	128,200	126,800
Evansville	177,300	176,600	176,500
Fort Wayne	211,800	213,700	208,700
Gary	276,100	274,600	272,000
Indianapolis	877,000	873,700	868,200
Kokomo	46,400	46,400	47,800
Lafayette	93,700	92,800	92,100
Michigan City	46,800	46,900	45,900
Muncie	52,400	52,200	52,600
South Bend	146,900	145,600	144,000
Terre Haute	74,300	73,100	72,900

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

### Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates
